

Commercial Shopfront and Security Shutters

Zenith Doors supply a wide range of roller shutters each designed to give maximum security and yet aesthetically pleasing to the eye. Commercial roller shutters are used in many varied locations ranging from offices, shops and schools to high street retail stores.

75mm galvanised lath roller shutter.

Available in solid 75mm or perforated lath. For smaller operatives where the door is manually raised, assisted by balanced springs within the roller barrel assembly. The maximum recommended size for this door is 3658 (12') x 3658mm (12').

Security options

- Locking by centre locking in the bottom rail
- For external applications guide pin lock
- Ground locks - can be fitted internally or externally

Electrical options

- Single Phase tubular motor, with safety brake, manual override and bottom edge
- Internal push button
- External or internal key switch
- Remote Control
- Photocells

Aluminium rolling shutters

38mm, 60mm or 75mm laths. These come complete with hood.

Options available: Solid or punched lath
Operation: Push / Pull or single phase 240V Tubular Motor.
(Operating Options as the 75mm lath door)

Standard colours White, Brown but also available in full range of RAL colours

Secureovision roller shutters

Designed to suit almost every application. Retail shop fronts, commercial premises and offices. 4 profiles to choose from. All shutters are able to mix solid and vision sections to optimise performance. Very popular in shopping malls, back lighting and the shutters combined with darker curtain colours greatly improves level of vision by the virtue of the higher contrast between internal and external light levels. Polycarbonate glazing is available with some designs to provide increased security.

Steel & Aluminium Grilles

Constructed from galvanised mild steel or aluminium, Tube & Link fitted on steel or aluminium bar. This type of curtain is ideal for Shopfronts, Counters, Car Parks or areas requiring security whilst still allowing good air flow and visibility.

Available with Push / Pull or Electrical operation.
