

## Crimeshield Window & Door Security

### The First Line in Security

Crime Shield is the first form of insurance approved window security conceived as an architectural product. There are no unsightly iron bars, steel mesh or expanded metal which may not even protect the glass.

Crime Shield doesn't disguise the attractiveness of existing windows and doors whether classical or contemporary, traditional or modern. It is a durable metal screen mounted in front of or behind existing windows. It is not a film or a fly-screen.

Crime Shield unobtrusively protects property and glazing by preventing access to windows. An optional quick release mechanism is available if required for emergency escape.

### Protection With Style

The Crime Shield window security system is manufactured from 2mm thick specially perforated steel plate, finished in external grade polyester powder coat paint, mounted into a two part extruded mitred and welded aluminium frame.

The perforated screen offers protection against unauthorised access to the property through the window, or door, whilst also protecting the glass against blows, rocks or even air gun pellets. For convenience and easy access for window cleaning, opening units are also available.

Crime Shield has been fitted in many locations including offices, factories, supermarkets, places of worship, public buildings and shops.

Crime Shield has been tested and evaluated to achieve a number of accreditations. It is a unique security product.
