

## Security Window Shutters

### SecureoShield

Unlike other certified shutters, SeceuroShield 3801 (tested and approved to LPS 1175-1) uses a 38mm double-walled extruded aluminium slat, which coils very tightly into a range of compact boxes (165mm - 250mm), minimising their visual impact. This is often a requirement for commercial and domestic installations where aesthetic considerations are paramount. Although supplied in either white or brown as standard, they can be powder coated to reflect corporate colours if required.

- **Insurance approved security**
- **Fits internally or externally in either the window reveal or the opening**
- **High Quality Finish**
- **Automatic motor locking or manual bullet locks**
- **Extensive guarantee for peace of mind**
- **All the electrical shutters are C.E. marked with certification**
- **Ideal for commercial and domestic use**

Why not view one of these fully sized shutters in our new extended

### Versatile

Fits internally or externally in either the window reveal or around the opening.

### High quality finish

Supplied in high quality white or brown powder coated finish as standard. Optional colours available - ask for selector chart.

### Secure

Locking is provided automatically from the motor. Manually operated doors incorporate bottom rail shoot locks or bullet locks to the side guides.

### Compact

Housings from 165mm - 250mm dependent on shutter height.

### Ease of use

Somfy tubular motors and control system provide electric operation as standard (ask for details on motor control options).
