

FIRE CURTAINS

Intelligent Automatic Fire Curtains are almost invisible when not in use, but provide a safe exit in the event of a fire. The curtain is automatically activated in the event of a fire alarm or power failure. It is strong enough to contain a fire for up to 2 hours whilst still allowing a route of escape by lifting the bottom rail to create a gap large enough to go under.

Features:

- **Helps Stop the spread of fire**
- **2 Hour Rating**
- **Invisible when not in use**
- **Auto-operation**
- **Gravity Fail Safe**
- **Complies with regulations**
- **Easy to maintain**

Neat and Unobtrusive

The box, guide rails and bottom rail are compact in size making concealment straightforward. Box size is just 200mm x 220mm and provides straight forward maintenance access.

Sophisticated Control

The fire curtain is powered by a 24VDC motor with a control system with full battery back up ensuring maintained function in the event of a power failure.

Improved Escape Opportunities and Safety

In extreme circumstances a trapped occupant can force an escape passage under the curtain which will then reseal.

Common Applications:

- **No compromise on design in large open planned offices**
- **Contain fire to create a safe escape route**
- **Kitchen servery hatch**
- **Contain area in a building e.g: restaurant/café area in a school/department store**
- **Greater protection on doors**
- **Contain fire within a lift**
- **Boundary protection to stop fire spreading to other premises e.g shopping centre**
