SPECIAL REQUIREMENTS

You must state in this section any special requirements

SURVEY CHECK LIST

- Please note the position of the fixing points shown in the illustrations on the right.
- The Flame Curtain must be fixed to appropriate masonry/concrete or steel supporting constructions that have a fire resistance of at least that specified for the Flame Curtain and are capable of maintaining adequate support for the required period.
- The motor is supplied with a 4m cable, ensure that a suitable location for the 300mm x 300mm control panel is identified.
- To complete the installation any gaps between the assembled Flame Curtain and the structure it has been fastened to should be filled with a fire rated sealant that has been shown by test to be suitable for the application and the fire resistance period required.

Please confirm that you have checked all of the above during the survey (Please tick)
